OSTEOLOGY BARCELONA 2019

Call for Abstracts

The Osteology Foundation and the Chairmen of the International Osteology Symposium in Barcelona invite investigators within the field of regenerative dentistry and oral tissue engineering to submit abstracts of original research work. A scientific evaluation committee will review and evaluate all submitted poster abstracts for consideration in the Poster Presentation as well as in the Research Forum. Each abstract will be evaluated by at least two members of the evaluation committee. Posters based on accepted poster abstracts shall be presented in the congress hall.

The authors of the six best abstracts submitted for consideration in the Osteology Research Forum in each of the two categories (basic and clinical research) will be invited by 28 February 2019. These investigators will be able to present the content of their posters in an oral presentation in the Osteology Research Forum in Barcelona, on Friday, 26 April 2019. Moreover, the investigators presenting in the Osteology Research Forum will obtain full reimbursement of the registration fee.

Osteology Research Prize and Poster Audience Award

The three best presentations in each of the two categories will be awarded a prize on Saturday 27 April 2019 in the following amounts:

- 1st prize € 1000 (basic and clinical research)
- 2nd prize € 750 (basic and clinical research)
- 3rd prize € 500 (basic and clinical research)

Additionally, the audience is encouraged to vote online for posters during the congress. An Audience Award in the amount of EUR 500 will be given to the poster that receives the highest number of votes (likes) during the congress.

ABOUT THE OSTEOLGY FOUNDATION

The Osteology Foundation's motto is 'Linking Science with Practice in Regeneration'. The foundation was established in 2003 and its core activities include funding research projects and organising national and international symposia across the world. In recent years, the Foundation has expanded its focus. Today, it also offers courses and textbooks specifically for researchers, as well as the online platform THE BOX, which connects practitioners and scientists in the field of oral tissue regeneration worldwide and provides them with tools and information.
